

ACHIEVEMENT FOR ALL

Achievement

At Tytherington High School we are committed to the concept of Achievement. Our prime aim is to recognise the abilities, aptitudes and interests of the individual and to provide opportunities and the support for that person to develop and to succeed, to value his or her own achievements and the achievements of others.

Purpose

Central to our purpose is the learning and educational achievement of each pupil. All our activities will be directed towards this fundamental purpose.

Culture

We shall develop a culture within the school which enables all individuals to learn and to achieve success. In order to achieve our general school aims the Headteacher and his staff will set high standards, foster a sense of discipline and provide equal opportunities for all. We shall develop a culture which challenges and extends all people involved with the school. We shall provide a culture of support, following the principles of Investors in People to the benefit of all concerned.

Environment

We shall seek to foster in all staff and pupils a pride in the community of the school. We shall achieve our aim of maintaining a pleasant environment which is conducive to learning. We shall seek always to improve the environment and to guarantee that it is safe and caring.

Community

We shall continue to play a key rôle within the community. As partners in education we shall maintain our strong links with other schools. We shall endeavour to further expand our established links with local industry. We shall involve parents, the wider community and the LEA as part of our wider consultation and partnership. We shall continue to value the contribution which others make to our school and to acknowledge the mutual benefits of co-operation.

Evaluation

We shall monitor closely our practices to ascertain whether we are achieving our aims. We shall continue to administer and further develop our procedures for monitoring and evaluation, through self-evaluation and performance management, which provide us with evidence to help individuals to achieve their full potential.

Accountability

The Headteacher and his staff will continue to work closely with the Governing Body of the school to actively pursue our stated philosophy of *Achievement for All*.
